HORMOTONE

in disorders of

MENSTRUATION

and the

MENOPAUSE

Hormotone supplies the physiological stimulus to the endocrine glands whose functional activity determines the normal menstrual flow.

When these internal secretions begin to fail at the period of the menopause, Hormotone acts both by substitution and homostimulation.

Dose: 1 or 2 tablets three times daily.

In cases of high blood pressure use

Hormotone Without Post-Pituitary

Adreno-Spermin Co. (Harrower)

is first and last A Quality Product

From the time that Adreno-Spermin Co. (Harrower) first came into recognition—by reason of the sterling service it rendered the profession during the influenza epidemics of 1918—to the present day, its quality has been the very highest. As year has succeeded year, however, improvements in technic and manufacturing methods have made it possible vastly to increase the potency and effectiveness of this formula. To-day, this adrenal-thyroid-spermin combination is unquestionably the best that money can buy. Since 1918 the scope of its usefulness also has increased. Besides being of value in convalescence following influenza, Adreno-Spermin Co. (Harrower) is indicated in all forms of

Hypoadrenia

asthenia, low blood-pressure, subnormal temperature, circulatory insufficiency, neurasthenia, and run-down conditions.

Adreno-Spermin Co. (Harrower) contains whole adrenal gr. ¼, thyroid gr. 1/12, spermin extract (from gonads) gr. 2, with calcium glycerophosphate as an excipient.

R Adreno-Spermin Co. (Harrower). No. C. Sig. 1 sanitablet q.i.d. at meals and at bedtime. (In acute cases, one every three hours.)

GRIPPE, INFLUENZA, or in POST-INFLUENZAL CONVALESCENCE

Prescribe

ANGIER'S EMULSION

The sedative, decongestive and antiphlogistic properties of Angier's Emulsion will transform the dry, unproductive cough into an easy, productive one, soothe the irritated mucous surfaces and overcome the catarrhal condition of the respiratory tract.

At the same time its heavy emulsified mineral oil content, will maintain normal elimination and keep the intestinal canal toxin-free, thereby aiding the patient materially in overcoming any existing catarrhal condition of the intestinal tract.

During convalescence, Angier's Emulsion soothes the digestive areas and improves assimilation, while the cumulative effect of the calcium and chemically combined phosphorus affords a desirable way for securing mineral rehabilitation.

Frequent small doses (1 teaspoonful every hour, preferably taken clear) are most effective.

Angier's may be used in conjunction with any prescribed treatment.

Angier's hastens convalescence and increases the patient's power of resistance. Try it.

Trial Bottles Free to Physicians The Wingate Chemical Co., Ltd. Montreal

The distressing symptoms that so often accompany the climacteric, but more particularly the aggravated symptoms of the artificial menopause, are frequently controlled by the administration of

LUTEIN TABLETS, H. W. & D. LUTEIN SOLUTION AMPULES, H. W. & D.

The choice of the medication depends, of course, on the judgment of the physician as to whether oral or hypodermatic administration is indicated. Both products represent the

CORPUS LUTEUM OF THE SOW

unmodified by treatment with solvents or by exposure to temperatures above animal body heat in the drying process. All separation of extraneous matter is made by mechanical means and all drying is in vacuo. The unaltered corpus luteum should, therefore, be presented in our products and clinical experience with them should demonstrate their therapeutic activity.

Ovarian dysfunction as evidenced in dysmenorrhea and amenorrhea is also an indication for Lutein medication, and if the diagnosis of such dysfunction is reasonably well established, definite therapeutic results may be expected.

WHOLE OVARY TABLETS, H. W. & D. OVARIAN RESIDUE TABLETS, H. W. & D.

are also offered for those who prefer, for certain indications, the use of the whole gland or of the residue remaining after corpus luteum separation.

Whenever the tissue building function of diet is of paramount importance in the treatment of disease and where at the same time there is impairment of function or other obstacle to normal nutrition, "Ovaltine" affords a wealth of nitrogenous and other vital food elements for rapidly rebuilding the wasted tissue and restoring the lowered capacity for the absorption of nourishment.

For these reasons "Ovaltine" has a world-wide medical endorsement for its use in the dietotherapeutic treatment of Convalescence, Malnutrition, Phthisis and other wasting diseases, or wherever tissue repair has to be carried out under conditions of difficult alimentation. It is a valuable prescription also in insomnia and diseases of the nervous system.

AMMONIACAL URINE

"As the case improves, dextrimaltose may be substituted for the malt extract so that the final formula reached will contain dextri-maltose as the carbohydrate."

MEAD'S DEXTRI-MALTOSE

QUITE apart from the local therapy and care of diapers in the control of cases of ammoniacal urine is the question of diet. Diet is an important matter.

The etiology, in the majority of these cases, indicates an intolerance for milk fat. High fat feedings result in an excess of volatile fatty acids in the stomach and intestines and a condition of "acidosis" prevails.

Constipation is a marked symptom. Hard, dry, crumbly stools of grey color can be shaken from the diaper without leaving stains; fat indigestion consisting chiefly of insoluble soaps.

Dietary treatment consists in the reduction of fats to the infant's tolerance and the increased addition of carbohydrates to restore the caloric value of the food.

Mead's Dextri-Maltose No. 3 is the indication, first, because of its easy assimilation and second, because it contains an alkali in the form of a 3% addition of potassium bicarbonate to aid in overcoming the constipation.

Mead's infant diet materials are advertised only to physicians. No feeding directions accompany trade packages. Information in regard to feeding is supplied to the mother by written instructions from her doctor, who changes the feedings from time to time to meet the nutritional requirements of the growing infant. Literature furnished only to physicians.

ULTRA-VIOLET LAMPS

↑не potency of Ultra-Violet Ray Therapy has such tremendous interest possibilities that every Medical Practitioner should investigate its use —in doing this you should strongly consider-

That the generator should have for its main purpose the production of Ultra-Violet Rays in quantity and quality efficient enough to insure the proper clinical results.

The Hanovia Quartz Lamps, the ALPINE SUN and KROMAYER do just these things.

With them the first clinical results were accomplished and the findings accepted by the Medical Profession. Today, they are recognized as standard the world over.

The intensity of these lamps means low-cost operation, and minimum therapeutic time—especially important in the busy office. Uninterrupted use is almost assured, as spare parts and adjustments are unnecessary.

Clip and mail the coupon for literature on these lamps and recent medical papers.

Putting Your Dollars to Work

WORK produces wealth. Dollars work too—if they are properly employed. And the result of their work is highly profitable.

The principles of sound investment have been established by the lessons of long experience. It will be worth while to examine them. They will show you how your dollars may be put profitably and securely at work.

For the guidance of the less experienced investor we have prepared a booklet outlining the principles which govern sound investment, and containing various accumulation and investment tables. A copy of "Putting your Dollars to Work" will be mailed on request.

Liver and Liver Extracts in the treatment of PERNICIOUS ANAEMIA

The specificity of the Minot-Murphy liver diet has been conclusively demonstrated in the therapy of pernicious anaemia. In many cases, however, it proves impracticable to keep patients on a diet rich in liver; but in these cases the oral administration of specially prepared liver extracts will achieve the desired results.

Liver Extract prepared according to a method devised by Cohn and his associates at the Harvard Medical School is available from the Connaught Laboratories, either as a powder or as a solution, in packages each of which contains the extract derived from approximately five pounds of liver. It is of equal therapeutic value in either form, but from a practical point of view the powder has certain obvious advantages over the liquid.

Information relating to the use of Liver Extract in the Treatment of Pernicious Anaemia will gladly be sent to any Physician or Hospital upon request.

CONNAUGHT LABORATORIES University of Toronto

Toronto 5 Canada

Diagnosis depends on definition

IN a radiograph of the head for example, the faintest minute shadow might mean an old fracture of the malar bone or of the zygomatic arch in which union had failed to take place—might indicate some intracranial calcification. But, only when such shadows appear sufficiently distinct as to eliminate the possibility of their being overlooked, is correct diagnosis assured.

A good intensifying screen helps tremendously in achieving clear cut radiographs—brilliance without too much contrast—details that stand out. And, with Pattersons in all cassettes you are sure of the utmost in screen action. For every characteristic that an intensifying screen should have is theirs—speed, lack of grain, freedom from lag, cleanability and above all uniformity. No one of these has been sacrificed to obtain the others.

For your convenience we have outlined approved methods of mounting and cleaning and directions for proper care of intensifying and fluoroscopic screens in an intelligent, comprehensive booklet. Write for a copy.

INTENSIFYING

FLUOROSCOPIC

For Easier Digestion

ONE of the important advantages of unsweetened evaporated milk is that it is easier to digest than boiled or pasteurized milk. A very fine soft curd is formed, due to sterilization and the homogenization of the butterfat.

Carnation Milk is one of the most favorably known exemplars of such *unsweet-ened* evaporated milk.

Carnation Milk is satisfactory from the vitamin standpoint. Only the antiscorbutic vitamin is compromised; formulas need only the usual supplement of orange or tomato juice. Carnation Milk is also a satisfactory source of calcium, phosphorus and nitrogen, slightly superior to pasteurized milk.

Carnation is milk of exceptional quality and purity—always uniform, always dependable. And obtainable everywhere.

We shall be glad to send to physicians and nurses, on request, authoritative material presenting the more important scientific evidence on this subject.

SQUIBB'S COD-LIVER-OIL

can bring your patients the highest benefits—because of its guaranteed higher-vitamin content

As a means of increasing vitality and building resistance, science has found nothing to equal good cod-liver oil. For it is the richest known source of both the health-promoting Vitamins A and D.

Since the chief value of cod-liver oil lies in its vitamin-content, it is important to prescribe whether for children or for your underpar patients a trustworthy vitamin tested oil.

To produce a cod-liver oil of the highest possible vitamin potency, several improvements over ordinary methods are used by Squibb. For instance, Squibb's Cod-Liver Oil is charged with carbon dioxide to protect it against the destructive action of air.

Due to this care, its content of growthpromoting, resistance-increasing Vitamin A is not less than 50,000 U. S. Pharmacopæia Units in each 100 grams.

Laboratory tests show that also its content of the antirachitic Vitamin D is ample to promote the development of strong, well-constructed bones and teeth.

This high content is guaranteed for both Vitamins A and D. You can therefore prescribe Squibb's Cod-Liver Oil, either mint-flavoured or plain, with the assurance that your patients will receive the requisite quantity of vitamins.

Protect your patients by insisting on Squibb's. At all reliable drug stores.

Secretary, Royal Society of Medicine,

1, Wimpole Street, London, W.1. by June 1st, 1929.

WANTED.—Roentgenologist for 100 bed hospital. Apply stating age, salary, qualifications and experience, to Box 93, Canadian Medical Association, 3640 University Street, Montreal.

WANTED.—Medical assistant. One year's experience \$1500. year with maintenance; recent graduate \$1200. year with maintenance. Tuberculosis Hospital, 160 beds on street car line two miles from centre of city. Surgery of chest, modern equipment, x-ray, etc. Apply Superintendent, Saint John County Hospital, East Saint John, N.B., Canada.

PHYSICIANS WANTED—Aznoe's Openings for Physicians: (A) House Physician wanted for regular routine work, 60-bed surgical approved hospital, New York. \$75. (B) Assistant in institution for mental defectives, north. \$150 and maintenance. (C) Single Junior physician wanted at once, west coast Tuberculosis hospital. \$150 and maintenance. No. 2205, Aznoe's National Physicians' Exchange, 30 North Michigan, Chicago.

B & L 2502 Colorimeter

with the "Easy to Read Scale"

TRANSLUCENT scales, a reflecting prism and a magnifier provide an excellent means for reading this Bausch & Lomb Colorimeter from the eyepoint position.

The verniers, too, are read from this same position. They are graduated to tenths and are easily adjustable by means of clamping heads on the back of the instrument.

Because the source of illumination of these scales is the same as that of the colorimeter mirror, a reading can easily be obtained even in a darkened room.

This "Easy to Read Scale" is just one of the many features that will give you a convenient and accurate means of colorimetry comparison. Complete details will gladly be furnished at your request.

The Tycos Office Type

Sphygmomanometer

IN the periodic health examination determination of blood pressure is an important point. The Tycos Office Type Sphygmomanometer, because of its peculiar construction, renders invaluable service in this work. In addition to accurate blood pressure readings much can be learned of the arterial wall consistency by study of the single systole.

The Tycos Office Type Sphygmomanometer illustrated has a 6" silvered metal dial, long black hand and heavy case. It is designed for use on table, desk, or it may be fastened directly to the wall. Its larger size enables much more accurate observation than is possible with the small pocket type model.

The new carrying case makes a convenient method of carrying and storing the Office Type Sphygmomanometer. Makes the instrument available for bed side work.

Royal College of Surgeons England

EXAMINATIONS IN CANADA

First Professional Examination for the Diploma of Fellow

TORONTO - JULY or AUGUST, 1929*

Arrangements have been completed by the Canadian Medical Association whereby the Royal College of Surgeons of England, will conduct in Canada the "Primary" examination in Anatomy and Physiology leading to the

FELLOWSHIP OF THE ROYAL COLLEGE OF SURGEONS OF ENGLAND

The examinations, both written and viva voce, will be held by two examiners in each subject sent from England, and one assessor in each subject who is resident in Canada, but appointed for the purpose by the Royal College.

A candidate for examination must deliver to the General Secretary of the Canadian Medical Association prior to April 1, 1929, for transmission to the Secretary of the Royal College of Surgeons, the following certificates:

- 1. Of matriculation at a "recognized University";
- 2. Of having completed the examinations in Anatomy and Physiology for degrees in Medicine and Surgery of a "recognized University";
- 3. Of having dissected in a "recognized" Medical School or Schools during six terms or eighteen months;

Note.—Dissections during the regular vacations will be accepted, provided the certificate shows that they have been performed under the superintendence of an authorized teacher in a "recognized" Medical School.

- 4. Of having attended in a "recognized" Medical School or Schools:—
 - (a) a course of lectures on Anatomy during two terms;
 - (b) a course of lectures on Physiology during two terms;
 - (c) a course of Experimental Physiology;

Note.—It is meant that the learners themselves shall, individually, be engaged on the necessary experiments, manipulations, etc.; but it is not hereby intended that the learners shall perform vivisections.

- (d) a course of Chemical Physiology;
- (e) a course of Histology.

The fee for examination or re-examination shall be \$100.00.

The Final Examination for the Fellowship is held only in England, and candidates for admission to that examination must have passed the Primary Examination and hold the Diploma of Member of the Royal College of Surgeons of England or have held for not less than four years a degree of a "recognized University" registrable on the Medical Register of Great Britain.

THE FELLOWSHIP OF MEDICINE AND POST-GRADUATE MEDICAL ASSOCIATION

No. 1, Wimpole Street, London, W. 1.

with which is associated some 50 General and Special Hospitals in London, is prepared to offer the following facilities to qualified practitioners:

- I General Courses are arranged covering all branches of Medicine and Surgery. These Courses occupy the student for several hours every day and last for two weeks.
- II For post-graduates requiring less intensive study, comprehensive tickets are issued admitting them to the ordinary hospital practice (general course)—ward-rounds, outpatient departments, operations, etc. These tickets permit the post-graduate to make out his own time-table to suit his requirements, and all information can be obtained at the office of the Fellowship. The approximate fees are as follows: 1 week, \$10: 2 weeks, \$15: 1 month, \$26: 2 months \$47: 3 months, \$63: 6 months, \$94, and 1 year \$105.
- III Special Courses are arranged at the Special Hospitals associated with the Fellowship, and these permit of intensive study in one specialty for a period ranging from 1 week to one month.

The Special courses arranged for the ensuing months are:—

FEBRUARY

Gynæcology	Feb. 11 to Feb. 23—Chelsea Hospital for Women. Mornings and/or afternoons. Fee £5.5s. 0d.
Dermatology	(Practical Pathological Demonstrations arranged. Fee £4 4s. 0d.)
Diseases of the Chest	Feb. 25 to Mar. 2-Brompton Hospital. All day. Fee £3 3s. 0d.
It is hoped to arrange later a course in Diseases	of Children.
Neurology	
	MARCH
Orthopædics	Mar. 11 to Mar. 23—Royal National Orthopædic Hospital. All day. Fee £3 3s, 0d. Minimum of 10.)
Ophthalmology	Mar. 11 to Mar. 23—Royal Eye Hospital. Afternoons only. Fee £1 1s. 0d.
A	PRIL (Easter Monday, April 1).
Practitioners' Course	Apr. 8 to Apr. 19—London Temperance Hospital. Late afternoons, 1½ hrs. Fee £1 1s. 0d.
Tropical Medicine	Apr. 9 to May 2—London School of Hygiene and Tropical Medicine. Tues. and Thurs. afternoons. Fee £2 2s. 0d.
Electro-Therapy	Apr. 10 to May 1—Royal Free Hospital. Wednesdays 5.15 p.m. Fee £1 1s. 0d. (limited to 16).
Medicine, Surgery and Gynæcology	Apr. 15 to May 4—Royal Waterloo Hospital. Afternoons and some mornings. Fee £3 3s. 0d.
Neurology	Apr. 15 to May 11—West End Hospital for Nervous Diseases. Daily 5 p.m. Fee £2 2s. 0d.

Copies of all Special course syllabuses and of the General Course Programme may be obtained on application. The Hospitals reserve the right to make any alterations necessary in dates and fees. Post-graduates are advised, therefore, to make early enquiry.

Special weekly Clinical Demonstrations in Medicine, in Surgery and in Ophthalmology arranged from October to July.

The Clinical Demonstrations and the Lectures are open to all members of the Medical Profession without fee.

Post-graduates may become Members of the Fellowship of Medicine and Post-Graduate Medical Association; the annual subscription is \$2.50, which includes the subscription to the monthly *Post-Graduate Medical Journal*. Subscription to the Journal only \$1.50. Every effort is made to assist Members to obtain the post-graduate work they require.

GRADUATE COURSE IN PEDIATRICS-

THE CHILDREN'S MEMORIAL HOSPITAL

In Affiliation With

THE UNIVERSITY OF CHICAGO

Four weeks' courses beginning June 4, August 1 and October 1. For general practitioners and those especially interested in pediatrics who wish in a short space of time to gain contact with the newer advances in pediatrics.

Clinical Instruction Supplemented by Lectures

The Children's Memorial Hospital has 260 beds. About 2,700 children are treated each year in the wards, and nearly 20,000 in the out-patient department. All these cases are available for teaching purposes. Course covers medical pediatrics, infant feeding, pediatric technic, heliotherapy and tuberculosis, orthopedics, laboratory methods of diagnosis and x-ray interpretation. Schedule and other information sent on request.

GRADUATE SCHOOL OF PEDIATRICS 707 Fullerton Avenue, Chicago, Ill.

THE ORIGINAL PRODUCT A Standard Remedy in Rheumatism and Gout

Extract from a recent (1926) Text Book of Medicine
". It (Phenylquinolin Atophan) is most useful in averting attacks. It is given in tablet form gr. xv. three times a day for three days of each week. It increases the output of uric acid in the urine and decreases the amount of uric acid in the blood. It may be given in this way every week without causing any ill-effects, and should prevent the continued accumulation of uric acid in the body. The patient should continue to take it in a reduced dosage for the rest of his life. . . . "

ANTIPHLOGISTIC—ANTIPYRETIC—ANALGESIC

Powder:—Packages of 1 oz.

Tablets gr. 7½—Tubes of 20—Bottles of 100 and 250

Dragees gr. 1½ (Keratin coated)—Bottles of 100.

Dose:—Two tablets thrice daily in water followed by a glass of — preferably — alkaline water.

'Atophan' Balsam, which is absorbed by the skin with extraordinary rapidity, admirably supplements 'Atophan' internally.

Relieves pain without inducing sleep.

ANNOUNCING THE NEW BRITESUN

"Maxray" Infra Red Lamp

THIS new modality is built to the usual Britesun standards of quality and precision. It is designed to give an even diffusion

of rays with no hot spots. The large, 15-inch parabolic aluminum reflector is highly polished on the outside with a combination French satin finish and high polish on inside. The size of the reflector permits coverage of one half the surface area of the body in one exposure.

A special joint permits reflector to be moved in a complete circle and a patented double arm adjustment is an outstanding feature and is far superior to the old "goose neck" type of arm.

Price Complete \$67.50

Due to increased production, Britesun, Inc.; are pleased to offer their Single Arc and Twin Arc Ultra-Violet Lamps at the following reduced prices:

A-62—Single Arc.....\$175.00 Formerly, \$200.00

A-82—Twin Arc.....\$200.00 Formerly, \$225.00

PULVOIDS NATRICO-for the Safe and Prompt Relief of High Blood Pressure

HIGH blood pressure is not a disease, nor should it be treated as a disease. It is a symptom, and a most important and significant symptom at that.

Pending the determination and correction of its underlying cause, a most effective agent for the reduction of immediate symptoms and for maintaining vascular tension at a safe level, without reaction, depression or gastro-intestinal disturbance, is Pulvoids Natrico, from the formula of Sir Lauder Brunton, modified by M. C. Thrush, M.D., of Central Hospital.

Exclusive permission to place this combination at the disposal of the entire medical profession has been granted to The Drug Products Co., Inc., of New York. Pulvoids Natrico are especially coated to pass through the stomach intact, avoiding gastric disturbance, and to disintegrate promptly in the intestinal tract. They have been used in thousands of cases, with gratifying results.

Dose: 1 to 3 Pulvoids a.i.d.

Originated and manufactured solely by THE DRUG PRODUCTS CO., Inc.

TORONTO MONTREAL

THERE has been an extraorumary avantage of interest in the use of light in the treatment THERE has been an extraordinary awakening of disease, both on the part of the general public and the medical profession.

"An astounding variety and number of sources of 'artificial sunlight' have been evolved and are now available. At this stage the busy general practitioner find himself somewhat bewildered. Somehow he appears to be shy about taking up the new form of treatment, and yet he knows that his patients have heard of its existence and are talking about it. Several good treatises on the subject of

Ultra-Violet Radiation have been published, but the busy practitioner is left rather at a loss as to what type of apparatus he should purchase, and what exactly he is venturing in the care, cost and management of such apparatus.

"The writer feels that for the man in general practice and for the busy medical officer of health the Quartz Mercury Vapour Lamp is the only practical proposition.

-J. Bell Ferguson, M. D., D. P. H., in his preface to "The Quartz Mercury Vapour Lamp."

There are logical reasons why many thousands of physicians and hospitals select the mercury vapor arc in quartz, in preference to all other artificial sources of ultraviolet radiations. The advantages realized with the Uviare burner, as used in all Victor Quartz Lamps, are important to every practice, general or specialized. The scientific advances in ultraviolet therapy, and its widespread adoption in the leading clinics in recent years, are coincident with the availability of the mercury vapor arc in quartz.

> You will find some valuable pointers in our booklet "A Few Facts Pertinent to the Consideration of Artificial Sources of Ultraviolet Radiations." Write for your copy, gratis. Write for your copy, gratis.

A New Ephedrine Nasal Spray

for promoting Sinus Ventilation and Drainage

EPHEDRINE INHALANT, Swan-Myers contains 1% solution of Ephedrine alkaloid in light mineral oil, colored for identification and fragrantly perfumed with oil of rose.

It contains no aromatics, such as menthol, thymol, camphor or eucalyptus which frequently irritate and sting. Patients experience no discomfort from the cold air after the use of this spray. Applied as an oil spray, or as drops in the nose, this Inhalant will contract capilliaries, reducing swelling of the turbinates and diminish hyperemia. It promotes sinus ventilation and drainage. Its action is prompt and sustained.

BARD-PARKER GERMICIDE — A NEW STERILIZING MEDIA FOR FINE EDGED STEEL INSTRUMENTS

The manufacturers of the famous detachable blade knife have recently perfected a new, powerful, non-corrosive sterilizing solution known as the Bard-Parker Germicide. This Germicide is made purposely for the sterilization of Bard-Parker Knife blades and other fine steel surgical instruments. It was discovered through conclusive laboratory tests that all chemical sterilizing solutions in common use either lacked sufficient germicidal strength or attacked the steel, ruining the keen edge of the blades. Furthermore, it was found that boiling water produced a strong, erosive, galvanic reaction upon the steel blades, completely destroying the edge. The Bard-Parker Company set about to find a sterilizing fluid that would possess sufficient germicidal strength and yet not re-act upon the steel blades. After exhaustive laboratory research and tests covering years' period, the new Germicide was evolved. It more than filled the two requirements. In the final tests the blades were submerged in the new Germicide for two weeks without reaction upon the steel or edges. The spore-bearing Bacillus Subtilis organism was used for the germicidal efficiency test. This organism possesses a high resistance to heat and chemical germicides and is considered as difficult to destroy as any of the pathogenic spore-bearing organisms. The final test showed complete destruction of Bacillus Subtilis organism in less than two hours with this Germicide. Bard-Parker Germicide is an ideal sterilizing medium for syringes, hypodermic needles and other metal instruments.

For Complemental Feeding

Prescribe DRYCO The Safe Milk

MANY pediatrists advocate regular complemental feedings for the breast fed infant. They find that this relieves the strain upon the mother, prolongs the nursing period and has an excellent effect upon the weight and general nutritional condition of the child. Such a procedure also minimizes the difficulties attendant upon eventual weaning.

Dryco is ideal for use in conjunction with breast milk. The special drying process renders the formation of thick, tenacious curds impossible, eliminating digestive and nutritional disturbances. Free from pathogenic bacteria, the use of Dryco avoids milk-borne infections.

Every Diphtheria Case Should Recover

If diagnosed EARLY and if enough Diphtheria Antitoxin is used

FREQUENTLY the physician is not called until dangerously late. Then, especially, a most dependable Diphtheria Antitoxin is required and repeated injections may even be needed.

Under such circumstances select Diphtheria Antitoxin, P. D. & Co. It is highly concentrated and purified; limpid and water-clear, with a minimum content of protein substances. The syringe contains 40% more antitoxin units than the label calls for. This provides for possible lessening of activity with lapse of time, assuring full label dosage up to the date stamped on the package.

Diphtheria Antitoxin, P. D. & Co., is supplied in syringe packages of latest improved type, ready for instant use.

DIPHTHERIA ANTITOXIN, P. D. & CO., IS INCLUDED IN N. N. R. BY THE COUNCIL ON PHARMACY AND CHEMISTRY OF THE AMERICAN MEDICAL ASSOCIATION

Patient Types . . .

The Obstinate Case

The patient with an obstinate case of constipation is generally addicted to self-medication and "tries everything." Each bowel-whipping cathartic simply drives the tired bowel from bad to worse.

The doctor knows it is possible to restore the normal daily "habit time" of bowel movement by appropriate diet, exercise and the mechanical aid afforded by Petrolagar.

Petrolagar is more palatable, more thoroughly softens the feces, is less likely to leak and, having no deleterious effect on digestion, is prescribed in preference to plain mineral oil.

IMPORTANT to PHYSICIANS ESPECIALLY GYNECOLOGISTS

Progressive Gynecologists and Physicians in general will welcome the advent of Pond's Tampon which offers an easy, safe and thorough method of vaginal and uterine medication. It combines the medicinal function of a vaginal suppository with the mechanical support offered by a correctly shaped tampon, ensuring the continued application of the medicament to the diseased areas and at the same time furnishing the necessary support.

furnishing the necessary support. The various treatments to which the tampon is adaptable will be at once apparent to the physician, but lacerations, leucorrhoea, gonorrhoea, prolapse, post-operative and post-confinement treatment, and uterine hemorrhage are some of the conditions in which Pond's Tampon offer new and most effective treatment. There are many unique points of advantage in treatment by Pond's Tampons are packed in six tampons to a box and are made in the fol-

pons to a box and are made in the fol-lowing medication:

"Physicians fighting to save twin's life"

This was the heading of a pathetic news item appearing in a recent issue of The Baltimore Sun. Two little boys had swallowed poison tablets taken from the family medicine cabinet. One is dead. The attending physicians saved the other only by heroic efforts.

Contrast this fatal tragedy with a harmless incident reported from Colorado, U.S.A., the other day. A little boy swallowed practically the entire contents of a three ounce bottle of Hexylresorcinol Solution S. T. 37. The anxious mother was assured it could not harm the child.

The safety feature of Hexylresorcinol Solution S. T. 37 should appeal to every physician. While this solution destroys bacteria on less than 15 seconds contact, it is perfectly SAFE. Accidental poisoning impossible.

Three and twelve-ounce bottles.

Designed for the Natural Foot

As an aid in the correction of foot troubles, the Cantilever Shoe has been effective.

The design and construction of the standard models are based upon the anatomical requirements of the foot.

The flexible Cantilever arch allows the foot to function freely in walking, thus strengthening the arch muscles by natural exercise. Free circulation is permitted by this flexibility and by the natural form of the lasts.

Support for tired or weakened muscles is provided by the up-sprung Cantilever arch. Lacing the shoe draws this leather snugly up against the foot, and the bones of the foot are held in their natural arched positions.

The forepart of the shoe provides room for all five toes. The big toe has room to straighten out and act as a lever in propelling the body forward.

Hence, there is comfort and ease in the

Cantilever Shoe

(For Women, Men and Children)

Straight-forward walking, and equal distribution of the body-weight are obtained by the scientific design of the Cantilever sole, and by the wedged heel, which is slightly higher on the inner edge, to swing the weight to the strong outer border of the foot.

Cantilever designs look well on a woman's foot. The oxfords give better support than is possible in the pumps. (The "Dress Models" are not designed for corrective purposes.) The men's shoes are good looking, comfortable and of firm wearing qualities.

If you do not find the name of your Cantilever dealer in your phone book, please write:

RELIEF!

....from the moment it is applied!

Relief, too, for the <u>busy</u> nurse, who knows from experience that ANTI-PHLOGISTINE applied warm and thick can be depended upon to supply and <u>maintain</u> a uniform degree of moist heat <u>during her entire off-duty period</u>.

By virtue of the synergistic combination of its ingredients the osmotic action of Antiphlogistine begins promptly, activating the superficial circulation, decongesting and allaying the painful processes without irritation and inducing natural and restful sleep.

Prescribed by the Medical Profession the world over for more than a quarter of a century in preference to fomentations and messy flaxseed poultices because its efficacy in the treatment of inflammations of both superficial and deep seated structures has never been questioned.

Antiphlogistine

A proven adjuvant in the treatment of Pneumonia.

LIQUID PEPTONOIDS WITH CREOSOTE

Combines the active and known therapeutic qualities of creosote and guaiacol with the nutritive properties of Liquid Peptonoids and is accordingly a thoroughly dependable product of definite quantities and recognized qualities as shown by the formula:

Each tablespoonful represents

Alcohol (By Volume)	12% 2 min.
GUAIACOL	1 min.
PROTEINS (Peptones and Propeptones) LACTOSE AND DEXTROSE	5.25% 11.3%
CANE SUGAR	2.5%
MINERAL CONSTITUENTS (Ash)	0.95%

It acts as a bronchial sedative and expectorant, exhibiting a peculiar ability to relieve *Bronchitis—acute or chronic*. It checks as well a persistent winter cough and without harsh or untoward effect. It is agreeable to the palate and acceptable to the stomach—with merit as an intestinal antiseptic. Supplied in 12 oz. bottles.

In Addition to Lactic Acid Milk C.M.P. Offers:

KLIM POWDERED WHOLE MILK

—whole milk to which nothing has been added and from which only the water content has been removed. It is uniform as to composition—low in bacteria count—safe and practical for infant feeding.

POWDERED PROTEIN MILK

This is the dehydrated equivalent of Finkelstein's original Eiweissmilch. Sustained recognition and approval testify to the fact that C.M.P. Powdered Protein Milk has a definite place in infant feeding.

(Recognizing the importance of scientific control, all contact with the laity is predicated on the policy that Lactic Acid Milk and its allied products be used in infant feeding only according to a physician's formula.)

Simplified Lactic Acid Milk Feeding

REALIZING the desirability, from the physician's viewpoint, of scientific simplification in infant feeding, C.M.P. Powdered Lactic Acid Milk is offered with claims that—

- —it represents the simplest and quickest method of preparing Lactic Acid Milk feedings.
- —it is absolutely uniform. Published analyses are strictly adhered to.
- —its precurdled casein forms in fine floccules. Blockage of the nipple holes cannot occur.
- —Bacillus lactis is retained in a viable condition.

The need for a fine curd in Milk is answered by C.M.P. Powdered Lactic Acid milk; for the fine curd is inherent in the product.

Solution PITUITARY

Extract "Front"

A STERILE, slightly acidulated, aqueous extract of the posterior lobe of the pituitary gland of cattle, standardized upon the isolated uterus of a virgin guinea pig (League of Nations' Standard)

We emphasize that—

- 1—Solution Pituitary Extract "Frosst" conforms to all the requirements of the Canadian Government with respect to potency, hydrogen ion concentration, sterility and quality of glass container.
- 2—Solution Pituitary Extract "Frosst" is in addition tested for vaso-pressor activity.
- 3—The depressor effect manifested by many commercial samples, and which is due to the presence of non-specific bases (e.g. histamine) is eliminated by our process of handling.
- 4—Freedom from irritation is insured by extremely low protein and inert extractive content.

in early production are incidental to this most important feature in the preparation of a uniformly potent oil. The laboratory, the rat, the autopsy room, the microscope, the biologist, are the agencies science employs to definitely assure the physician that each bottle of Mead's Cod Liver Oil -plain or flavored—is rich and uniform in vitamin D potency.

Nothing is left to chance or guess-work. The registration number on each bottle of oil was given the fish in Newfoundland as

in dissected rat tibias in which severe rickets have been developed.

An almost insignificant amount of oil is found deficient in Vitamin D. This small quantity is disposed of for soapmaking. Assurance of positive potency in every bottle of Mead's Standardized Cod Liver Oil has accounted for its ready acceptance by the medical profession.

It is this complete and thorough control that is responsible for the excellence of Mead's Standardized Cod Liver Oil.

Note for the Medical Profession

A Powerful Non-Toxic Germicide

EFFECTIVE coal-tar antiseptics are severely restricted in clinical use by their damaging action on tissues. Except in a few instances, their usefulness lies mainly in the disinfection of utensils, etc.

An antiseptic of equal germicidal efficiency, and without destructive action on tissues, could be employed in clinical practice for purposes and with effects hitherto unprecedented. MONSOL IS SUCH AN ANTISEPTIC.

GERMICIDAL EFFICIENCY

Tested in the presence of organic matter, the germicidal efficiency of Monsol for fæcal bacteria greatly exceeds that of other representative antiseptics. The selective action of Monsol classes it apart from any antiseptic of similar origin, in that its efficiency is greatest for the Gram-positive cocci. Monsol kills the Streptococcus Pyogenes in a dilution more than 10 times greater than phenol or lysol.

TOXICITY

Monsol is absolutely non-irritant to the skin. Effective solutions of Monsol can be applied to mucous membranes. Large amounts of pure Monsol given by the alimentary tract to animals have failed to demonstrate any poisoning action. Monsol has been given intravenously to animals in amounts equivalent to no less than 1-600th of the total blood volume with only transient ill-effects. No other antiseptic exists which possesses these properties.

Life Assurance for Medical Men

The Handicap of the Doctor

Medical men are at a great financial disadvantage as compared with those in business, or even in other professions. They play a lone hand. Their skill is their sole asset. They cannot depute their work, even in part, to others. Unlike men in other callings, they have not the protection of partnership agreements which at death will convert the goodwill of their connection into cash for their dependents.

Their incomes are limited sharply by the extent of their own physical powers.

Through experience and toil their reputations and their incomes steadily increase. But so do the standards of living of their families. Educational, social, domestic and benevolent demands multiply apace. And, failing some financial precaution, the doctor's whole asset, on which the comfort of his dependents hangs, is swept away by death.

How it is Removed

The Sun Life Company has a plan whereby a medical man may obtain a retirement income on a guaranteed basis from the proceeds of assurance, the income to begin at a definite age.

Ask a Sun Life agent or apply to

Sun Life Assurance Company of Canada

CHOLE-CYSTO-COL

(Colloidal Tetraiodophenolphthalein)

A New and Superior Medium for Gall Bladder Radiography

Cholecystocol presents tetraiodophenolphthalein in the form of a colloidal suspension stable toward the gastric juice and readily absorbable from the intestine.

The advantages of this new product are:

- (1) The dose is small—only two grams.
- (2) The administration is simple. One dose in a glass of water, forms a pleasant and palatable drink.
- (3) A distinct Cholecystogram is normally obtained within twelve hours.
- (4) The possibility of non-visualization is reduced to a minimum.
- (5) Nausea, laxative action. or other discomforts are seldom encountered.

Cholecystocol may be secured in single dose bottles, in cartons containing twelve such individual dose bottles and in cartons of one-half gross. If your dealer cannot supply you, order direct from

ABBOTT LABORATORIES

TORONTO, ONT.
